

AI Clinical Coding

The next step in clinical coding

1 EXTRACT

We extract data from your digital clinical systems using a secure HSCN connection for specified cohorts of activity.

2 PROCESS

We work with you to ensure that the data extracts provide everything we need to clinically code the data.

3 CODE

We apply the clinical coding process to assign accurate and complete codes to the data.

4 REPATRIATE

We return the data to your PAS system using the secure connection.
