1 Introduction

We value the business relationships we have with our suppliers and seek to build lasting relationships, treating them fairly and paying promptly. We want to work with suppliers and supply chain partners that share our values. Our aim is to work together to achieve the highest standards in our supply chain, whilst achieving wider social, economic, and environmental benefits aligned to the Social Value Act. This Supplier Charter (“Charter”) sets out how we conduct business in an open, honest, and transparent manner, and what we expect of our suppliers.

We understand that, depending on the nature and scale of supply, different aspects of this Charter will be more relevant to some suppliers than others. This enables us to agree suitable targets with suppliers that are appropriate to their product or service offering.

As a minimum, we expect our suppliers to comply with all applicable laws and regulations. This includes the provision of safe working conditions, treating workers with dignity and respect, acting ethically and being environmentally responsible.

This Charter will evolve over time, reviewed with our suppliers, to reflect changing standards in society, the environment, and the digital economy.

We want to work with our suppliers to tackle issues together and promote and maintain high standards of social, environmental, and ethical conduct.

We will continually review our supply base to ensure it delivers for our customers while addressing the need to reduce supply chain complexity and improve service quality.
