

## CHKS live – Release Document

Release date: 25/05/2021

### iCompare product update

The CHKS iCompare programme has been updated to add additional content, new functionality, maintenance updates and bug fixes.

If you want to discuss any on the information included in this release note please contact your CHKS consultant or e-mail [info@chks.co.uk](mailto:info@chks.co.uk).

### New Indicators

- Average Charlson Score
- Spell to FCE ratio
- % Telemedicine outpatient attendances

### Functionality Updates

#### Alerts

We have made a number of changes to the Alerts functionality within iCompare.

- A 'Good Alerts' option has been added which can be activated in custom options.
- The Alert logic has been revised to accommodate 'good' alerts
- A Checkbox has been added to display alerts only.
- Mortality Alerts Module - heatmaps have checkbox to display negative (red and amber) alerts only.
- Mortality Alerts Module - heatmaps can now be exported.

#### Charts

- A checkbox has been added to funnel and scatter plots to hide sites with no values.

#### Filters

- Additional custom options have been added to enable user to choose the way filters are applied.

### Maintenance updates

- Updated English Population tables used within iCommissioner
- All Risk Model Indicators for 2018 have been removed leaving 2019 versions in place
- Updated Specialty and Treatment Function description tables to the latest version and associated updates to indicator criteria
- Updated Operative Procedure List to the latest version

The release also included a number of bug fixes.

***The next planned release is for the Market Intelligence product and scheduled for June 2021. The next maintenance release for iCompare is scheduled for Q3. This release is subject to change due to resource allocation.***
